*Who Are We?*

Welcome to the first of many applications written by Company Systems Ltd, we are a small bespoke software company who specialize in data capture and information processing systems. Using to-days technology to aid and enhance your business.

Using the professionals within your business to ensure that the software we write meets your business needs. Our pledge is to give you quality systems at a affordable price.

Drillmate© is our first data capture tool for the drilling industry, providing accurate job capturing that will be used to produce your clients reports quickly and effectively. Using one of the best and easiest data capturing tools in the market to-day, this PalmOS base system will speed up your reporting and provide your clients with the information they require quickly.

The handheld software will record each jobs details, and then allow you to easily transport information back to the office reducing loss of information.

The handheld software will also allow you to switch between jobs quickly and easily without the loss of information.

*Please note, the size of memory determines how many jobs and data that can be retained upon the PALMOS.*

*System Requirements.*

- Desktop PC with Microsoft Windows XP (Home / Professional).
- PALMOS handheld computer. *Note the amount of memory required for this application can be 3meg, but not recommended.*
- PALMOS Desktop HOT Sync pre-installed.
